School Age Vaccinator 2, 4, 10, 11,

1. Introduction to the NIVS System

Please be advised that all NEW vaccine records should now be recorded using RAVS.

NIVS will continue to be available for vaccine corrections and reporting.

The National Immunisation and Vaccination System (NIVS) is used for recording COVID, flu, and HPV Vaccinations for healthcare workers and patients.

This document outlines the processes for gaining access to and using NIVS. It is designed as a simple guide to assist users in navigating through all steps of the process.

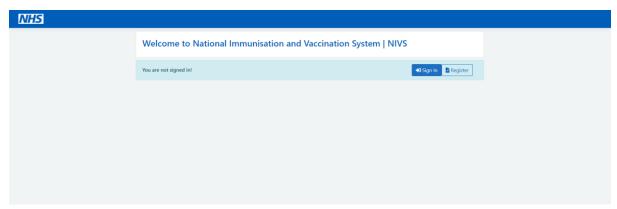

Any data shown in screen shots is not real data and has been created for training purposes only. For school vaccinator, the HPV and flu input is done via bulk upload.

If you have any queries or issues with the system, please contact the NIVS helpdesk at the following email address: nivs@england.nhs.uk.

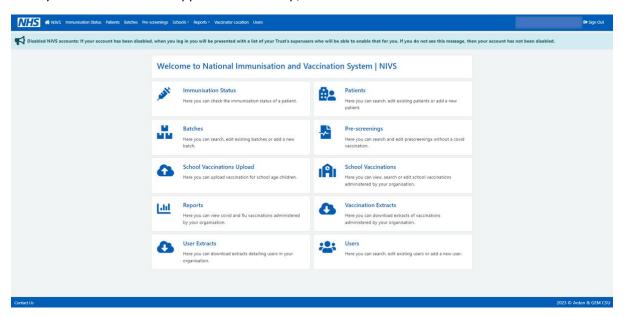

The NIVS site can be found at the following web address: https://nivs.ardengemcsu.nhs.uk/home.

Once your access has been approved and set up, the home screen will look like this:

Please note, you will NOT have all these options available. Depending on your role(s), you will have a combination of the following:

Vaccinator: Immunisation Status, Patients, Batches, Pre-screenings

School Vaccinator: School Covid, Flu and HPV vaccinations.

Vaccinator Reporting: Reports

Organisational Superuser: As per Vaccinator, with the addition of Users

2. Registering for a NIVS Account

Contact superusers in first instance. If unsure, please contact helpdesk who will request access on your behalf from your trust's Superusers (role selection and site selection plus general site overview). Whilst you can click on 'Register' on the NIVS homepage, this is **not** the quickest way to gain access.

2.1 How to register for an account

The easiest way to register for an account is for a 'Superuser' from your trust to create an account for you. This will automatically create a NIVS account. If you do not already have an OKTA account set up, you should receive an email from noreply@okta.com to activate your account and set your password. If you do not receive an activation email, please contact nivs@england.nhs.uk and we will assist you with account activation.

If you do not know who the Superusers for your trust are, please contact nivs@england.nhs.uk and we will contact them for you and request that they create an account for you if they approve your access.

Please note that whilst there is an option to register for a NIVS account on the NIVS homepage, this is **not** the quickest way to gain access to the system.

2.2 Requesting a Role

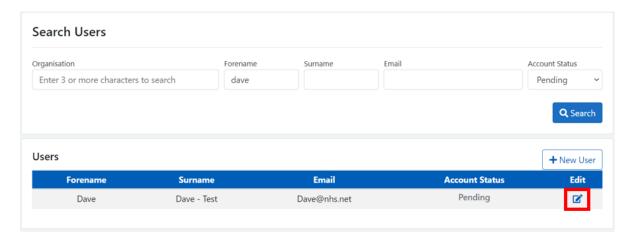

If you need to request a role, please contact the NIVS Helpdesk (<u>nivs@england.nhs.uk</u>) who will then advise you of the contact details for your organisation's Superuser(s). You will then need to contact the Superuser to request your role. If the role you have requested is able to be approved, the Superuser will approve this within NIVS. This is the same process for every role you may require.

2.3 Superusers – Approval and Removal of Roles, and Enabling an Account

To edit a user's roles, you will need to select 'Users' from the menu bar along the top of the screen. You will then be taken to a 'Search Users' screen where you will be able to search for the user in question. You can also search for any pending users within your organisation.

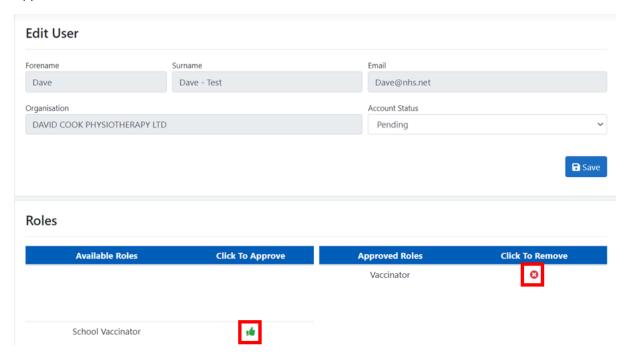

You will then be provided with a list of users. Once you have found the user whose roles you need to amend, select the 'Edit' button on the right-hand side of their name.

You will then be taken to the 'Edit User' page where you can approve any roles that they do not already have assigned and remove any roles they are currently assigned by using the 'Click To Approve' and 'Click to Remove' buttons:

You can also enable or disable accounts by changing the 'Account Status' and clicking 'Save'.

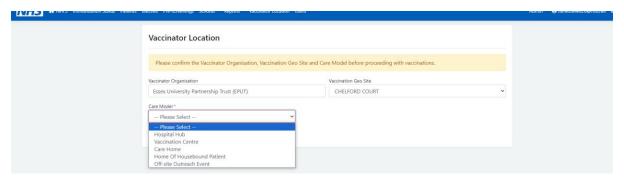

3. Vaccinator Location

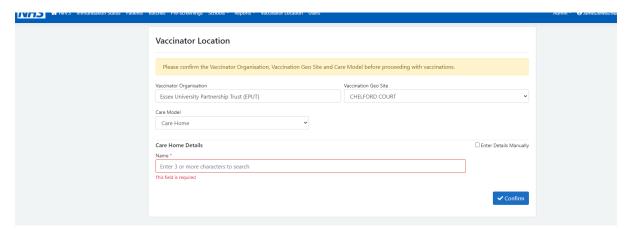

The 'Vaccinator Location' appears when you log in and select either 'Immunisation Status', 'Patients', 'Batches', or 'Pre-Screening'.

Here it will request the 'Organisation', 'Vaccination Geo Site', and 'Care Model'. Once this has been selected, it is set for the duration of the time you are logged in. To change a 'Care Model' option or hub you will need to log out and log back in again.

The 'Care Model' dropdown will give you five options for the location type. Select the required model and confirm.

If you are selecting the 'Care Home' option, then you will be required to input the name of the care home as shown below. When you start to type the name, NIVS will display the available options based on your search.

You can also enter the details manually by ticking the 'Enter Details Manually' box and then entering the name, ODS code, address, and postcode of the care home.

You can now start to add or review vaccinations.

4. The Immunisation Status

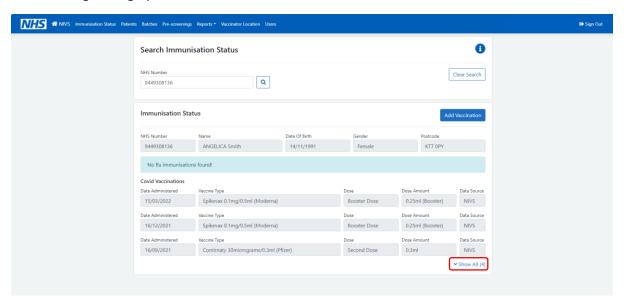

The 'Immunisation Status' section of NIVS will allow you to view the dates of Covid or flu vaccinations of any patient, as well as the demographic information when the patient's NHS number is entered.

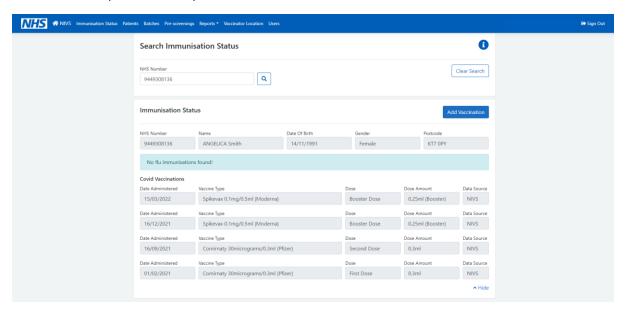

This allows you to search for patients and view their full vaccination history without the need to do a full patient registration.

To view this information, you will need to search by entering either the patient's NHS number or **all** the following demographic information: Forename, Surname, Gender, Date of Birth, and Postcode.

To view the patient's vaccination history, click on 'Show All' at the bottom right of the screen.

This will then expand to show previous vaccinations.

Note: Privately administered vaccinations are NOT shared with NHS England therefore will not be shown on NIVS.

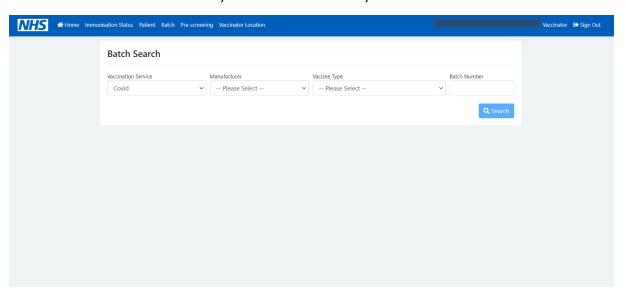

5. Batches

Please be advised that you cannot add New Batches into NIVS as NIVS is only available for editing existing vaccination records.

5.1 Checking Batches

If you click on the **Batch** option on the home screen, you will find this page, from where you can search for batches that have already been added onto the system:

You will need to select Covid from the Vaccination Service option, and then select the Manufacturer and/or the Batch Number. You will then see a list of batches that adhere to these criteria.

5.2 Editing Batches

Batches can be edited by searching for them as per the first image and clicking on the edit box on the right-hand side. This will allow you to change the information found in the second image.

Additionally, when editing batches, they can be marked as depleted. This will mean that they do not appear in the Batch Number field (as shown in Section 6.2)

6. Adding a Patient

Please be advised that all NEW vaccine records should now be recorded using RAVS. NIVS will continue to be available for vaccine corrections and reporting.

6.1 Searching for a Patient

The first thing to do before adding a patient is to search for them to see whether they are already on the system. You can do this by clicking on the **Patient** option on the home screen, and then

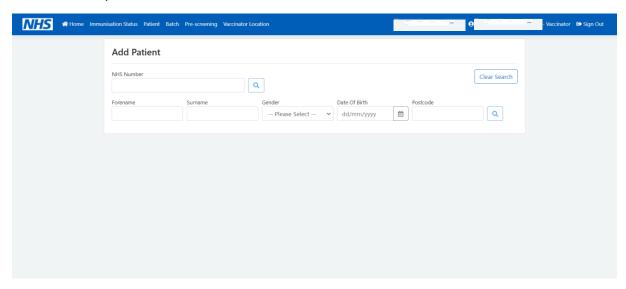

searching via the options below. You can search via any of the options, although searching via more fields will narrow down the number of results considerably.

6.2 Adding a Patient to the System

The easiest way to add a patient to the system is to click on **+New Patient** after completing a search, which will take you to this screen:

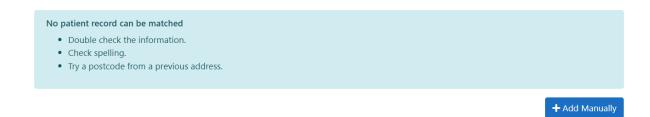

There are two options for adding the patient's details on this screen – the easiest is to fill in the patient's NHS number and click on the magnifying glass next to this field, which will automatically complete the demographic information with the information held on the NHS spine records. Alternatively, you can fill in **all** the demographic fields and then click on the magnifying glass next to the postcode field, which will add in the NHS number, again by searching from spine records.

If, when clicking on the magnifying glass, you see a red **Server-side error** notification, please see section 6.4 for more guidance.

6.3 Adding a Patient without an NHS number

If a patient does not have an NHS number, you should fill in the demographic information as above, and if the below message appears, you can enter the details manually by clicking on **+Add Manually**.

After clicking +Add Manually, you will see this screen:

Add Patient Confirmation

Please confirm you want to create a manual record

Checklist

- · Double check the information.
- · Check spelling.
- Try a postcode from a previous address.

Risks involved

- Not having the NHS Number prevents the system from displaying any previous vaccination record, therefore increasing the risk of duplicate vaccinations.
- The NHS Number is required to identify which GP Practice the patient is registered with. Adding the NHS Number will update the patients GP Record.
- The NHS Number is used to identify patients who have had the vaccine and to ensure they are invited for a second dose. Having the NHS number prevents them from being invited for a first dose more than once.

You should then click **Confirm** if you have read the warning message and complete the demographic information and questions that were shown in section 5.1.

6.4 Troubleshooting in the case of a server-side error

If you receive a server-side error when adding a patient, then this is likely because the patient has already been entered onto the system, either with a different NHS number or manually without an NHS number. In this case, you will need to search for the patient via **demographic information**.

If the patient then appears without an NHS number, you can go to this patient's page, click on Update NHS Number, fill it in, click on the magnifying glass, and then click Save.

If it has been entered under a different NHS number, you will need to speak to your trust's superuser to resolve this, as they will be able to delete the incorrect NHS number or speak to NHS Digital to resolve the issue if it has been added via a different system. If you do not know who your trust's superuser is, please contact nivs@england.nhs.uk and we will let you know who this is.

7. Editing Vaccinations

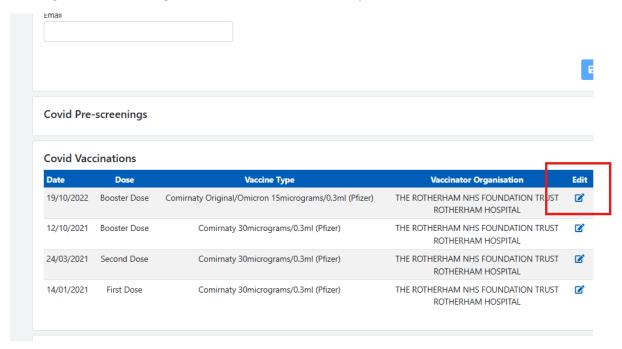

Vaccinations on NIVS can only be amended for 365 days. Any new vaccinations need to be entered in RAVS.

7.1 Edit the Vaccination

Please go to Edit on the right-hand side of the vaccination you wish to edit.

Having selected this, you will then be taken to the vaccination edit page where any data can be updated.

Please find below definitions for some of the fields:

Vaccinator – the person who is **administering** the vaccination

Clinician Drawing Up Vaccine – the person who draws up the vaccination (please note that if this is person is not qualified, then you will need to fill in the details of the Supervising Clinician – this will appear when Qualified? – No is selected)

Responsible Clinician – the person who has **overall responsibility** for the clinic which where the vaccination is taking place.

For third doses which are **not** booster doses (e.g., for immunosuppressed patients), then you will need to select Booster Dose in the Dose field. If it is a Moderna vaccination, then in this case you should select **0.5ml (Primary Course)** in the Dose Amount field. For Pfizer or AstraZeneca vaccinations, this should be saved as a standard booster dose.

7.2 Adverse Reactions

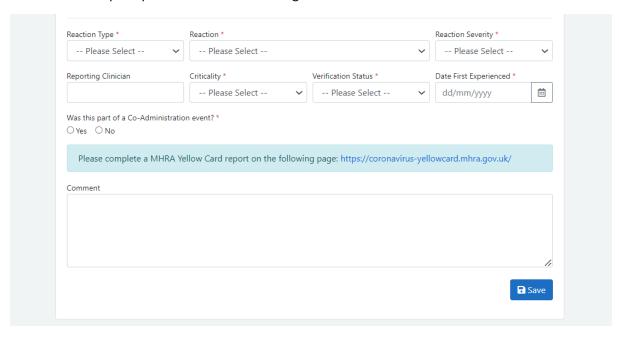

Once a vaccination has been saved, there is the option to add a record of an adverse reaction. To add this, you should click on the saved vaccination and scroll to the bottom to find this:

You will then be prompted to fill in the following information:

As above, all fields with red lines are mandatory. You should click Save to add the reaction record to the vaccination record.

7.3 Troubleshooting in the case of a server-side error

If you receive a server-side error when adding a patient, then this is likely because the patient has already been entered onto the system, either with a different NHS number or manually without an NHS number. In this case, you will need to search for the patient via **demographic information**.

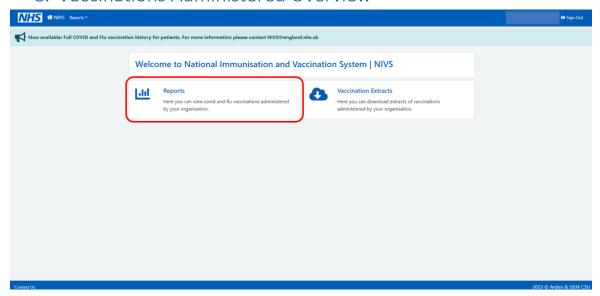

If the patient then appears without an NHS number, you can go to this patient's page, click on Update NHS Number, fill it in, click on the magnifying glass, and then click Save.

If it has been entered under a different NHS number, you will need to speak to your trust's superuser to resolve this, as they will be able to delete the incorrect NHS number or speak to NHS Digital to resolve the issue if it has been added via a different system. If you do not know who your trust's superuser is, please contact nivs@england.nhs.uk and we will let you know who this is.

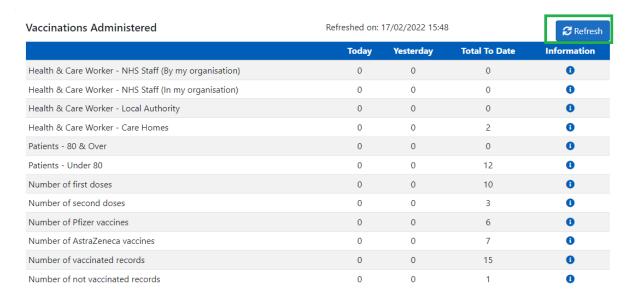

8. Vaccinations Administered Overview

This is the option that will need to be clicked on to access the reporting function of the site.

The Vaccination Administered Dashboard will provide data on vaccinations within your organisation. Click **Run Report** for the dashboard to update and then Refresh to include up to date data.

Common Filters

- The dashboard reports on only vaccinated records, non-vaccine events are excluded
- The data is also filtered on the recorded organisation of the vaccinator, originally from each user's profile, now recorded prior to vaccinating within the application.
- 8.1 Explanation of the Overview Sections

Health & Care Worker - NHS Staff (By my organisation)

This report records all staff identified as NHS Staff who have been vaccinated by your organisation. NHS Staff are derived from their recorded employing organisation that is captured when a patient is registered into NIVS, this has an associated organisation type code. These are NHS Trust and Other NHS; these are available in the data extracts.

Health & Care Worker – NHS Staff (in my organisation)

This report records all staff identified as NHS Staff who have been vaccinated by your organisation who work for your organisation. NHS Staff are derived from their recorded employing organisation that is captured when a patient is registered into NIVS, this has an associated organisation type code. These are NHS Trust and Other NHS, these are available in the data extracts.

Health & Care Worker - Local Authority

This report records all staff identified as Social Care Staff who have been vaccinated by your organisation. LA Staff are derived from their recorded employing organisation that is captured when a patient is registered into NIVS, this has an associated organisation type code. This is Local Authority for LA Staff

Health & Care Worker - Care Home Worker

This report records all staff identified as Care Home Staff who have been vaccinated by your organisation. Care home Staff are derived from their recorded employing organisation that is captured when a patient is registered into NIVS, this has an associated organisation type code. This is Care Home for Care Home Staff

Patients 80 and Over

This report identifies all patients who have not been flagged as Health Care Workers who are aged 80 and over at the point of their vaccination.

Patients under 80

This report identifies all patients who have not been flagged as Health Care Workers who are aged under 80 at the point of their vaccination.

Number of First Doses

This report identifies all vaccination records that have been recorded with a dose of "Administration of first dose of SARS-CoV-2 vaccine"

Number of Second Doses

This report identifies all vaccination records that have been recorded with a dose of "Administration of second dose of SARS-CoV-2 vaccine"

Number of Pfizer

This report identifies all vaccination records that have been recorded with an administration of the Pfizer vaccine

Number of AstraZeneca

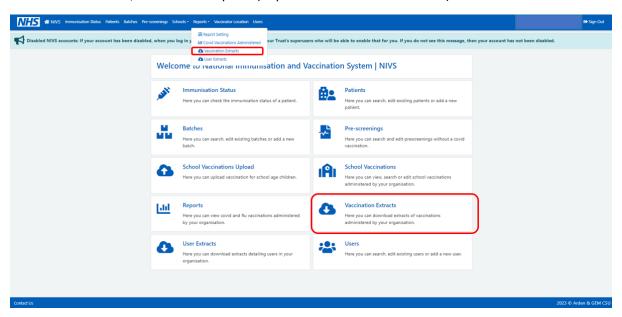

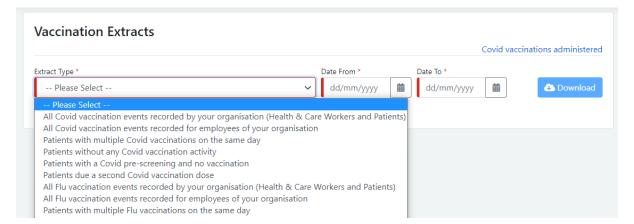

This report identifies all vaccination records that have been recorded with an administration of the AstraZeneca vaccine

9. Downloading Reporting Extracts

There are two areas in which you can download an extract – from the homepage selecting Vaccination Extracts, or from the top bar (Reports -> Vaccination Extracts).

You will then be taken to this page, where you will be able to download an extract.

Select the extract type from the drop-down menu, which is explained below. You can select to download data between dates, then select download. This will then download a CSV excel file with the data you have selected on extract type.

Please note: You can only download reports within a two-week date limit. This can be any two weeks from 31/08/2023 but there is a download extract size limit.

If you require any other dates ranges, please email NIVS@england.nhs.uk

9.1 Extract Type

All Covid vaccination events recorded for your organisation:

This report extracts all patients that your organisation has vaccinated. As part of the vaccination record, the code of the vaccinating organisation is recorded. This is based upon the organisation selected prior to the session for vaccinating. You can either select a filtered list based on the patient vaccination date. This data set has the extended detail for all the data recorded against their vaccination. There is a two-week maximum file size for this extract.

All Covid vaccination events recorded for employees of your organisation:

This report extracts all patients recorded on NIVS who have been saved as being an employee of your organisation. This may help you to identify the vaccination status of employees at your organisation. There is a two-week maximum file size for this extract.

Patients with multiple Covid vaccinations on the same day:

The extract's purpose is to support organisations to identify possible duplicate vaccination records. The organisation can identify if they are duplicate and pass to the Super User in the organisation who has the capability within that role to delete the duplicate. NB: only vaccinations with no Adverse Reactions recorded can be deleted.

Patients without any Covid vaccination activity:

This extract will show all patients saved on the system who do not have a Covid pre-screening, or vaccination recorded.

Patients with Covid pre-screening and no vaccination:

This extract exports all patients who have had a pre-screening recorded, but who have not had a vaccination record completed. This allows the organisation to either highlight records that need a vaccination record completing or to identify records that may have been entered in error. The new Super User functionality can delete these records if required.

Patients due a second Covid vaccination dose:

This extract is based upon the notion of a 12-week window from vaccination date. It is not prescriptive, but an aid to support the follow up for second doses. A due date to and from field can be selected.

All Flu vaccination events recorded by your organisation:

This report extracts all patients that your organisation has vaccinated. As part of the vaccination record, the code of the vaccinating organisation is recorded. This is based upon the organisation selected prior to the session for vaccinating. You can either select a filtered list based on the patient vaccination date. This data set has the extended detail for all the data recorded against their vaccination. There is a two-week maximum file size for this extract.

All flu vaccinations events recorded for employees of your organisation:

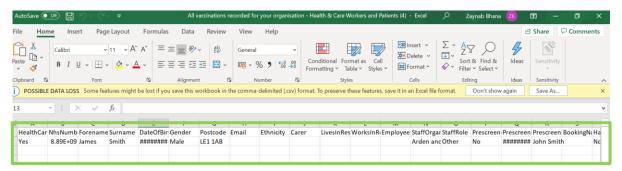

This report extracts all patients recorded on NIVS who have a flu vaccination saved on their patient screen and who have been saved as being an employee of your organisation. This may help you to identify the vaccination status of employees at your organisation. There is a two-week maximum file size for this extract.

Patients with multiple Flu vaccinations on the same day

The extract's purpose is to support organisations to identify possible duplicate vaccination records. The organisation can identify if they are duplicate and pass to the Super User in the organisation who has the capability within that role to delete the duplicate. NB: only vaccinations with no Adverse Reactions recorded can be deleted.

Reporting Extract CSV Files

The download will appear in an excel csv format

The extract file now contains fields for new updates to the systems. Including: ethnicity, prescreenings, organisation, and the user who added in the event.

11. Uploading School Flu or HPV Vaccination Files

To upload vaccinations, please fill in the CSV file template with the information based in the technical specification. If you do not have the technical specification, please email us at nivs@england.nhs.uk.

Once you have filled in the CSV file, you will need to submit the CSV file using the upload function, following either of the 2 steps below:

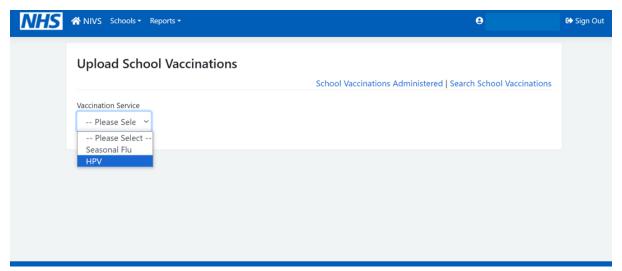

- 1. Click on **Upload School Vaccinations** under the **Schools** dropdown on the top banner.
- 2. Click on the School Vaccinations Upload box,

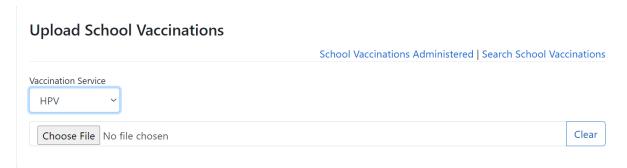

and then click on **Upload School Vaccinations** on the subsequent screen.

Following either of the steps above will take you to this screen below, select which vaccination type you wish to upload. Then select choose file and upload the required file.

The system will validate your file, highlighting any identified errors. These will need to be corrected before you are able to upload.

You can see from the example above that, if there are any errors, it will highlight which row the error is on and the field that needs attention.

Upload School Vaccinations School Vaccinations Administered | Search School Vaccinations Choose file Training - FAKE DATA - School_Bulk_Upload CORRECT.csv Clear File validation passed successfully. Please click the upload button to complete the process.

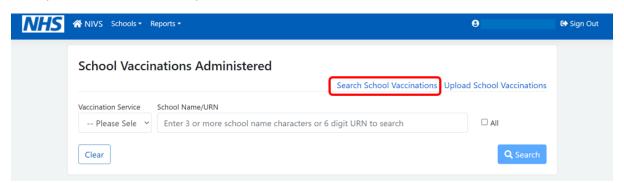

Once this has been corrected you will get a message, saying the file has passed validation, as per below. REMEMBER to press the Upload button.

11.1 Editing School Records

To edit a school record that has been uploaded incorrectly, you will need to click on this option on the homepage:

Once you have clicked on this, you will need to click on Search School Vaccinations, as below:

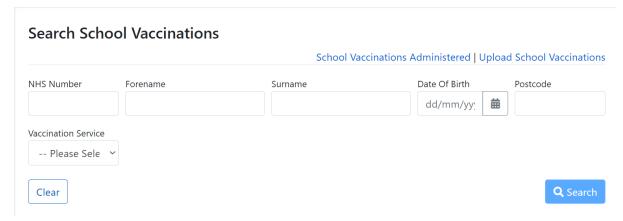

You will be directed to this page, where you will be able to search for the record that needs editing by entering the vaccination service type: Flu or HPV, then the demographic details and selecting search.

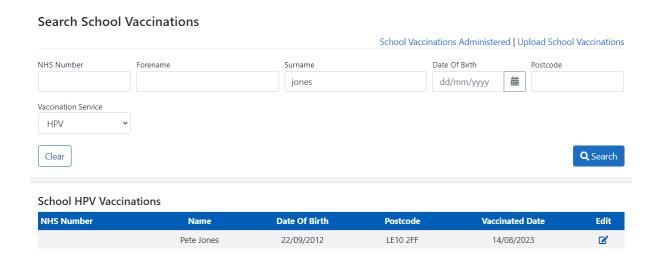

NOTE: You can search using partial demographic data.

Once you found the record that you want to edit, select the correct version, and edit by selecting the last blue box at the end of the record.

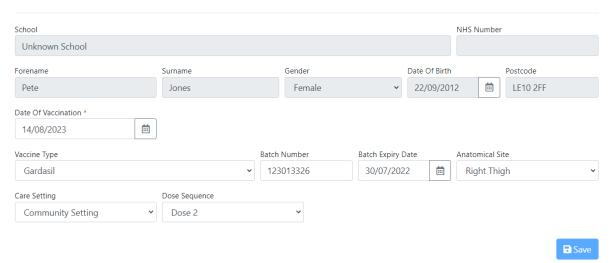

You are then able to edit the record you want and change the details that have been entered by mistake. Once you have finished, select Save.

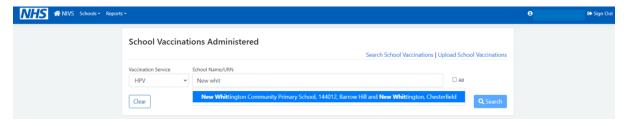

Edit School HPV Vaccination

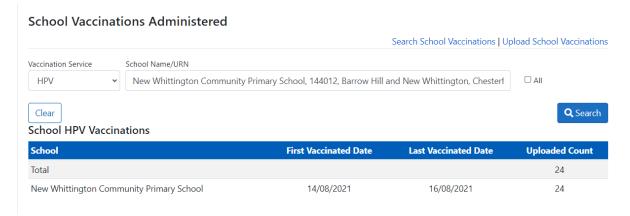

11.2 School Vaccination details for your Organisation

Back on the home page for school age vaccinator, there is now the option to see the total School vaccinations for your organisation. You can search for the school's name or URN number.

This will then bring you back the details of the first and last vaccination dates and the total count.

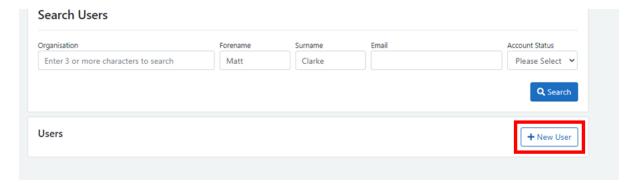

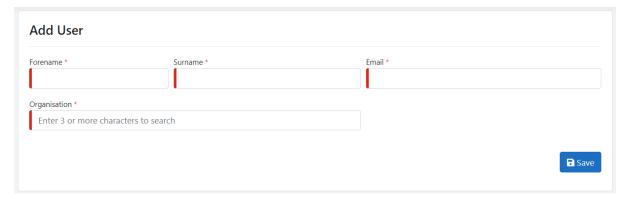

12. Adding New Users

To add a new user onto NIVS you will first need to check that they do not already have an account by clicking Users in the menu bar at the top of the screen and entering the user's details into the User Search. If they do not appear in the list of Users below the search fields, then you can add them

You will then be taken to the Add New User page where you will need to fill in all fields before clicking Save.

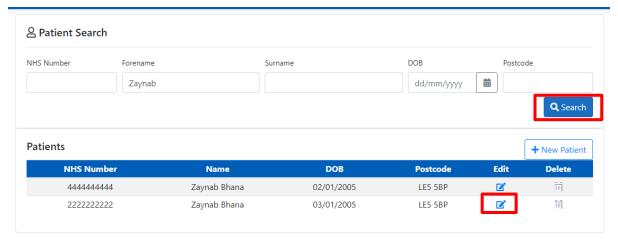

NOTE: Only nhs.net email addresses should be added into NIVS.

- 13. Deleting Patients, Vaccinations and Pre-Screenings
- 13.1 Deleting a Pre-screening

To delete a pre-screening, please search for the correct patient.

If the patient has a pre-screening record or a vaccination record the Delete icon will appear greyed out. Please Click on the edit icon to delete the pre-screening record.

Click on the red delete Icon to delete the Pre-screening record.

This will take you to the pre-screening record where you will be shown the below message. You can then click delete or cancel.

13.2 Deleting a Vaccination Record

To delete a vaccination record, click on the red delete icon.

This will take you to the vaccination record, where you will be shown this message to confirm. You can then Click delete or Cancel request.

Are you sure you want to delete this Covid Vaccination? Deleting the vaccination will also delete the Pre-screening associated with it!

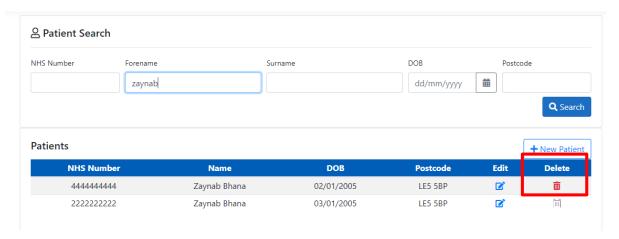

N.B. If a vaccination record has had an Adverse Reaction record you will not be able to delete that vaccination record. The delete icon will appear greyed out.

13.3 Deleting a Patient

To delete a patient, please search for the correct patient. To delete a patient the icon will appear red.

A patient record can only be deleted if they do not have a pre-screening record or a vaccination record.

By clicking on the delete icon. This will take you to the patient record, where you will see this message below. You can then delete the patient record or cancel request.

N.B. Once a record has been deleted, it cannot be retrieved.

14. Contact Details

For most queries, you should email the helpdesk with any screenshots or descriptions of any issues you are experiencing. We are also contactable by phone.

Email: nivs@england.nhs.uk

Phone: 0121 611 0187

From 27.01.2025 the phone number will be 0333 038 4268

Helpdesk Operating Hours: Monday to Friday: 08:00 – 18:00

You can find further supporting documentation on the Arden & GEM website:

https://www.ardengemcsu.nhs.uk/nivs
