

Support for the Life Sciences sector

Fostering collaboration and accelerating adoption to care pathways and patient outcomes

- ✓ **Navigate NHS complexity**
- ✓ **Expertise and insight across product lifecycle**
- ✓ **Value and enhanced access to NHS markets**
- ✓ **Enhance patient outcomes**
- ✓ **Deliver sustainable change**

Life science organisations play a crucial role in providing the NHS with medical research and driving the development of new treatments and technologies that enhance patient care and outcomes.

However, for many life science organisations, navigating the complexities of NHS markets can be a constant challenge. Lengthy procurement processes, stringent regulatory requirements and ever-growing financial constraints can make getting your life-changing products into the hands of patients a difficult task. Additionally, the fragmented nature of the NHS landscape means that understanding where there is a demand for your products and in which areas they can make the biggest positive impact on patients also requires specialist knowledge and in-depth research.

We partner with the life sciences sector to support your objectives by understanding how improved adoption of tools, technology and medicines in the NHS will enable both industry growth and value for the NHS. We seek to contribute at every level to improve health outcomes at patient, system and population level.

Support for the Life Sciences sector

NHS Arden & GEM works with over 90 organisations across the health and care system including NHS England, local commissioners, provider trusts and primary care.

As part of the NHS fabric, but with commercial focus, we fully understand national policy and how this translates to operational delivery, system requirements and the day-to-day challenges across the system. Our expertise spans specialised and broader health commissioning and our service offer can support your business objectives throughout the product lifecycle.

As a trusted supplier of thousands of core services across the NHS, we fully understand national policy, operational delivery challenges and the importance of clinical engagement. Our work with life science partners provides expert NHS insight and perspective to support product innovation, access, and wider enablers that can deliver value and efficiency. We can help you to accelerate the adoption of tools, technology and medicines in the NHS to improve health outcomes.

We are proud to be part of the NHS and uphold its principles and core values in all that we do. Our ambition is to deliver tangible outcomes to the NHS by leveraging strategic partners and building strength-based alliances.
